PRESS RELEASE June 12, 2007

BulletProof Electronics is excited to announce that it has won the [INPEX](#) (INPEX®, America's largest invention show) **Grand Prix Award** for its HeistProof and ARSE keyless ignition and vehicle immobilizer module. We were also awarded: A GOLD in transportation/vehicles; A GOLD award in gadgets; A Silver award in industrial equipment, and a Bronze award in each of the following: electronics/electrical, design-technical, and automotive.

The ARSE (Automated Recognition System Electronics) HeistProof module requires that a vehicle operator carry a transponder card in their rear pocket or wallet. All an operator must do is sit on their equipment and press the starter button. The equipment will start if the module recognizes the operator as a person authorized to start the equipment. No more removing gloves or trying to get under your rain suit or in your jeans to get to a key. No more key!

HEIST PROOF FEATURES:

- ▶ Virtually no chance of joy riding or drive off theft.
- ▶ No codes, numbers to remember or remote controllers with buttons to press.
- ▶ Cannot be defeated with a screwdriver, lock pick, crowbar or hammer.
- ▶ Provides magical like starting only for the authorized user(s)/operator(s).
- ▶ Discount opportunities with most insurance companies (check with your insurance agent for details).
- ▶ 100% AMERICAN MADE!
